The Leader in Bulk Diesel
Fuel Receipt, Issue,
& Dispense

BULK DIESEL FUEL SYSTEMS OVERVIEW

Millennium Systems International, LLC is the leader in Bulk Diesel Fuel Receipt, Issue & Dispensing Systems for both military and commercial customers worldwide.

CAPABILITIES

MARS Diesel Fuel Receipt & Issue Systems are designed to offload, filter & meter diesel fuel at flowrates ranging from 200 to 500 USGPM.

PUMPING EQUIPMENT

Blackmer Positive Displacement Pumps with electric motor (TEFC or XP) or optional diesel engine drives are available. Duplex pump option available upon request.

FILTRATION

Filtration options include Facet Horizontal Coalescer Separators or Vertical filter/monitors w/water-absorbing filter elements. Electronic water defense is an available option.

METERING

Liquid Controls Positive Displacement Meters w/bulk air eliminators and air block valves guarantee custody transfer accuracy.

PIPING SYSTEM

Full port, Fire-Safe Ball Valves and welded steel piping are standard features on every system.

CONTROLS

Control panels are available in NEMA 4 or NEMA 4/7/9 (explosion-proof) designs. PLC-based control systems available upon request. All panels are U.L. 508A listed.
